

Infinity Support Services was established in 2011, and is a program management and technical support consulting company. We provide acquisition and procurement, engineering, product support and sustainment, as well as financial management, IT systems and networking, and operational logistics. Infinity is a Small Disadvantaged Business (SDB) and has been a designated Small Business Administration (SBA) Certified 8(a) Program Participant since July 2012. We have established ourselves as a highly-valued partner, having secured multiple large business contracts supporting Department of Defense (DoD) service programs. Our goal is to empower our customers to successfully complete their mission on a daily basis.

## Our Experience

### Program Manager, Marine Intelligence (PMMI)

- Technical Support
- System Architecture Development
- System of Systems Support
- Cybersecurity Certification
- Internet Support Plan (ISP) Development
- Cross Architecture Analysis
- Database Configuration Management
- Strategy Authoring
- Software Version Document (SVD) Development
- Software Tracking Database Creation
- Systems Engineering and Cyber Security Database Creation
- Policy and Guidance Recommendations
- Virtualization Technology Policy and Guidance
- Virtualization Guidebook Creation
- Plan of Action and Milestones (POA&M) Creation
- Technical Analysis
- Emerging Technologies Recommendations
- Technical Analysis and Recommendations
- Software Virtualization and Security Briefs
- Interface Analysis
- Data Management
- Technical Education

### Naval Surface Warfare Center (NSWC) Corona Division

- Data Migration Strategies
- Integrated Master Schedule Development
- Alternatives Assessment
- Automated Function Algorithms Development
- Functional Analysis
- Course of Action (COA) Analysis
- Specified Quantity Assurance
- Quality Control (QC)
- SharePoint Utilization

**Infinity Support Services** brings decades of defense IT experience to bear in overcoming challenging government and industry technology issues such as support and migration of legacy IT systems, upgrading to modern systems, and navigating the complex Information Assurance Certification process. We understand the capability gap between the demanding cyber issues of today and the intricate cloud environment of tomorrow. Information Technology is deeply integrated into nearly all modern warfighting systems. It is imperative that timelines are developed only after gaining an understanding of the priorities of each specific architecture and project. Occasionally architectures and systems need to be improved or created from the ground up to fit a critical need. Infinity has a proven track record of providing both while using the right components and providing the greatest value.
